

SEALING Screw

SEALING screw cold stamping produced by CELO S.A.

1. Characteristics of cold stamping SEALING Screw

Head Type

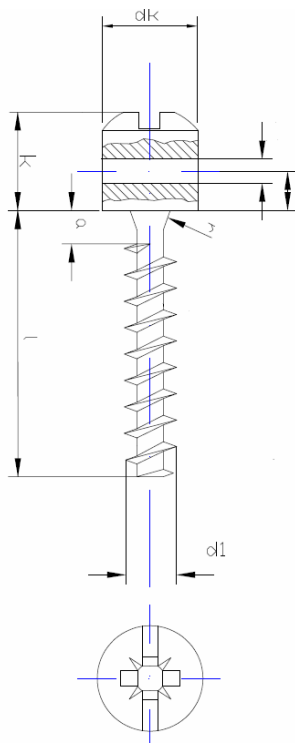

- Big or Reduced cylindrical head
- Possibility of 1 o 2 holes

Recess Type

- Pozi + Slot recess
- SLOT recess

Thread Type

- Machine Thread
- Plastic Thread
- Machine Partial Thread

2. Advantages of the cold stamping SEALING screw

- Screw manufactured in steel to obtain better mechanical performance.
- POZI DRIVE + SLOT Recess improves the assembly process, keeping the accessibility of the SLOT recess to the end user.
- Plastic thread allows the elimination of metal inserts, providing:
 - Cost reduction
 - Better recycling of the plastic part
 - Better resistance to vibrational loosening

3. Applications of SEALING Screws.

- Electric boxes.
- Enclosures
- Electricity Meters.
- Gas meters.
- Taximeters.
